June 26, 2023

Dear Customer: Items shown below are a 2.5" Burner Block, a 2.5 Mini Square Giberson head 18-7/32, a V100 Ransome Venturi with #69 orifice, a 0-30 PSI Gauge, a Needle Valve, a Fisher FS-67CH-743 gas regulator, a 5 foot hose with Left Hand (LH) 9/16 threads, two 1/4" NPT to 9/16 (LH) adaptors, and one 1/4" to tank thread (a Radnot #6400-3975). Please have a competent gas plumber install these parts together. Below is one arraignment, but the burner and parts can be placed any number of variations. You will need to provide parts as elbows and nipples to connect these components. Please view attached literature called "mini-square burners.v1.2.pdf" and " mini\_sq projs.qrk.pdf"
